Full Audit Control

KeyWin Pro Software

Key-Box Key Management Systems are the affordable intelligent choice!

Key-Box Automated Key Management Systems

Choosing the right system for your key mgmt. requirements. Key-Box offers its exclusive **Non-Locking** intelligent key fobs. Designed for the auto industry

A brief description on how the **non-locking** works

The way the Key-Box key systems with individual **Non-Locking Key Fobs**. Each individual user is issued a pre-selected PIN which is entered on the cabinet keypad. Once the PIN is entered and authorized by the system the door automatically opens and the user will have access to any key/keys in the cabinet. After the key is removed the system records when it was taken, when it is returned and the user's information etc. If a curfew or time limit is set in the system and a key is not returned on time the system will automatically generate an email to management notifying them of the past due key and user name etc. The system therefore gives you a complete audit trail 24/7 of the usage on your valuable facilities, and vehicle keys while encouraging user accountability

Key-Box Secure-Lock **Non-Locking Key Fobs**

Choosing the size of the key slot capacity in your Key-Box cabinet is an easy task. Simply choose the number of key strips you require in the cabinet each key strip contains 14 key slots

All Key-Box key cabinets include our exclusive Secure-Lock 100% solid metal standard non locking key fobs designed for the automotive industry

Secure Key Management Solutions

Key-Box systems are powered by KeyWin Pro Software

Key-Box Key Management Systems

Technical Specifications

9500 SC-EC L series

Modular Design Features

The 9500 SC-EC L series is Designed to accommodate **196 keys (or key sets)** within two cabinets, the innovative **9500 SC-EC L Series** design allows for starting small and later expanding by adding expansion key cabinets and expansion key strips multiples of 14 key positions (called expansion key strips) as required.

Expansion Non-Locking Key Strips provide a solution for organizations requiring high security but still an audit of key usage. **LED lighting** indicate which keys can be taken, which keys are restricted and assist the user when returning the key to the correct location

14 key non-locking expansion key strip with LED indicating

- Spare solid metal intelligent key fobs

Key Management Software

Smart and Simple

Administrative tool for management of your valuable keys

KeyWin-Pro software license is included free of charge with all **Key-Box** key management systems with no annual fees!

Key-Box Key Systems are Powered By **KeyWin-PRO**

Key Management Software with Total Accountability

KeyWin - PRO Gives you total control. Easy to use, Easy to Manage

Flexible KeyWin PRO makes it easy to manage everything from around 10 keys up to several thousand keys. You can use one key cabinet or 100 key cabinets in the same key management system and at different locations. The key management system can be managed by a single administrator, or shared with other administrators.

Users, groups and keys are simple and quick to register. You determine which users and groups get which keys by connecting them in the key management system. Every use of the key is registered, and a simple search lets you find out who has had what key and when.

KeyWin - PRO Countdown Function Feature

This function determines how many times the user can enter the key cabinet, value box or compartment

KeyWin - PRO Provides total Control of your keys - Even from the other side of the world

KeyWin Pro keeps your keys in order. You can easily connect via TCP/IP and communicate via the network connection so you can simply administer and program your Key control series key cabinet, whether you are in the same office block or anywhere in the world.

You log into the key cabinet as a user using your personal code. Each key has a key peg with a unique identity, which is placed in a strip that in turn communicates with the KeyWin5 key management program, where each separate event is registered. The key strips then indicate which keys you have access to or, if a key has already been removed, you receive information on the display about who is using the key. You can also search for historic information about keys in KeyWin5 program.

KeyWin - PRO Loaded with Features

Easy to Use
The administrator determines the members of staff who have access to a specific key by entering which user can log into the key cabinet or value box with his or her personal code.

Create User Groups
You can simplify administration when there are many users with different access rights by creating groups. It is possible to create both key groups and user groups

Name Keys
You give each key a name of your choice, or a key ID, to create order in your key management.

Intelligent Search Functions The search function finds everything in KeyWin, since it searches on files, email, contacts, groups, alarms, etc. - as fast as you type.

Visual Cabinet View Gives you the option to view the key cabinet's status and edit the keys in the key cabinet.

Time Channel Limit a group's use by setting a time channel. The group's keys are available when the time channel is active.

Event Log All events are registered in the log, both from key cabinets and from KeyWin5. You choose what will be shown. The intelligent search function, with select options and timeframe, simplifies obtaining the right information and producing reports

Backup You can easily create backups for the entire key management program. They are automatically named with the date and time; it is just as simple to restore the backup as it is to create it

Alarm Indication When you receive an alarm, the alarm is clearly marked by a red event in the event log and you can easily see who or what has triggered the alarm

Export You can always make a backup of the event log. Either via a CSV file which you can import to Excel or direct to a PDF file

Communication Settings You have a number of possible communication settings that can be synchronized with your network.

Alarm Settings You can choose between many different alarms for your key cabinet. For example, door alarm, key alarm, break-in alarm, etc.

KeyWin - PRO and KEYBOX Security Key Cabinets

The Key-Box series smart range of electronic key cabinets with electronic key identification for monitoring and control of each individual key. The Key-Box administration is performed using the PC program keyWin5 Pro, where all events are logged and saved
