Sure-Grip Quality Tamper Proof Key Rings/Seals

by Time Access Systems Inc

Sure-Grip High Security Serialized Security Tamper Proof Key Rings

Sure-Grip serialized tamper proof key rings provide you with the ultimate in strength, durability and asset protection. Rings are laser engraved with uniquely serialized numbers that provide for an adult trail and maximum security at all times. The rings cannot be opened without detection thus preventing asset removal or substitution. They may serve on their own as a high strength key ring or in conjunction with other systems of protection for your most valuable assets. Ring come in four different sizes and require only one crimping tool to close. **Sure-Grip** serialized tamper proof key rings are available in high quality solid stainless steel or **flexible** cable.

Security Features:
•*Laser engraved with uniquely serialized numbers that provide for an audit trail and maximum security at all times.*
•*Our 100% Stainless Steel High Security Key Ring design cannot be opened and closed without detection.*
