Affordable Key Management Systems for Military Facilities

Key-Box Intelligent Key/Asset Management for all Types of Businesses and Organizations

9400 SC Series

***For Storing/Securing All
Businesses / Organizations
Facility/Asset Keys***

Key-Box

9400 SC Series

The Key-Box software provides a full audit trail and real time reporting, detailing who has used each set of keys and when. As a result, staff become more accountable and our customers have found that keys are returned at the end of shifts. This leads to reduce security requirements, with less loss, damage and liability

Benefits

- Manage, control and report on the use of facility and asset keys
- Identify when keys are taken and returned, and by whom
- Restrict access to specific site and facility keys for staff and contractors
- Improve shift start-ups by ensuring important keys are always in place and ready to use
- Completely remove the need for manual key issue
- Reduce losses and damage by making users fully accountable
- Fully scalable to accommodate any number of keys
- 24/7 Audit trails of all key activities.

Do you know where your valuable facilities keys are? With Key-Box automated key systems you'll always know where your keys are 24/7!

North America's Most Affordable Key Management Systems

Affordable Secure Solutions

What is Key-Box 9400 SC?

Key-Box 9400 SC is a sophisticated PC Based network ready key management system which combines innovative high technology and robust design to provide small, medium and large sized businesses with the advanced management of keys or key sets in an affordable plug and play system

Key-Box 9400 SC Operation

- Easy plug and play solution with advanced secure technology
- Pin access keypad to access designated keys or key sets which are individually locked in place
- Keys are securely attached using a tamper proof security key ring
- Simple to configure and set up via KeyWin 6 Pro Software
- Easy to use network connection
- Concealed robust mounting points allow for secure wall mounting

Key-Box 9400 SC Features

- User key and access rights administration
- Multilingual functionality
- Full audit trail and reporting capability via KeyWin 6 Pro software
- Robust long life solid metal key fobs with tamper proof key rings
- Locking key slot receptors with LED's
- Robust power coated rust resistant steel cabinet
- Email alerts
- Emergency door release functions
- Audible alarms
- Key-Box 9400 SC can be expanded in the future as your needs grow
- 3 year limited warranty

How does the 9400 SC work

Ensuring that the right keys are available to the right people at the right times is a concern for every organization

The user simply enters his/her unique assigned PIN to gain access to the key cabinet. Optional card access readers are available to match your existing access cards.

All keys and keysets are individually locked by the Key-Box system green LED's indicate those keys to which the user has access to all other keys will stay locked and will continue to remain locked in place

Keys are easily returned to the key cabinet the user enters his/her PIN on the keypad the door will automatically open the key/keys are simply inserted back in their slots and are locked in place

Key-Box 9400 SC secure key rings. The secure one time tamper proof security ring is cost effective and simple to apply without the need for special

Key-Box 9400 SC Includes:

- Locking key strips with LED indicating light
- Intelligent solid metal key fobs
- Tamper proof key rings
- KeyWin 6 Pro software
- Ethernet communication cable
- Easy to follow set up instructions

The Key-Box 9400 SC is available in 14, 28 or 42 key slot capacity within the same cabinet

Key-Box 9400 SC robust solid metal key fobs are attached to a robust security tamper proof ring individual keys or keysets are assigned a specific receptor within the key cabinet and locked in place until released by an authorized user

Full Audit Control

KeyWin 6 Pro Software

Key-Box Key Management Systems are the affordable intelligent choice!

Key-Box Automated Key Management Systems

Choosing the right key system for your key management requirement is an important task to ensuring that you are choosing a key system that will secure your valuable keys 24/7 Key-Box is an easy intelligent choice as it's the only key system in the market place that offers its exclusive **Secure-Lock** high security 100% solid metal intelligent locking key fobs. Each key fob is individually locked in place inside the cabinet to ensure keys are not removed by unauthorized users

Secure-Lock
Exclusive 100% solid metal
intelligent locking key fobs

Key-Box

Intelligent Solutions for securing your valuable keys/assets

A brief description on how the key-box **Secure-Lock** locking key fobs work

The way **Key-Box** automated key systems work with the individual **High Security "Secure-Lock" Locking Key Fobs**. Each individual user is issued a pre-selected PIN which is entered on the cabinet keypad. Once the PIN is entered and authorized by the system the door automatically opens and the user will have access to only those keys authorized to them. The remainder of the keys stay securely locked in the cabinet. After a key is removed, the system records when it was taken, when it is returned and the user's information etc. If a curfew or time limit is set in the system, and a key is not returned on time, the system will automatically generate an email to management notifying them of the past due key/keys and user name etc. The system therefore gives you a complete audit trail 24/7 of the usage on your valuable facilities, assets and vehicle keys while encouraging user accountability

Our **Secure-Lock** 100% solid metal intelligent locking key fobs is the intelligent choice for securing keys/assets

Choosing the size of the key slot capacity in your Key-Box cabinet is an easy task Simply choose the number of key strips you require in the cabinet each key strip contains 14 key slots

All Key-Box key cabinets include our exclusive **Secure-Lock** 100% solid metal locking key fobs for securing your valuable keys/assets

Key-Box Key Management Systems

Technical Specifications

9400 SC Series

Modular Design Features

Designed to accommodate **between 14 and 42 keys (or key sets)**, the innovative **9400 SC Series** design allows for starting small and later expanding by adding multiples of 14 key positions (called expansion key strips) as required.

Expansion Key Strips are defined as locking or non-locking. Locking receptor strips **lock the key fobs** in place restricting access to authorized personnel down to the individual key. Non-locking expansion strips provide a solution for organizations requiring less security but still an audit of key usage. **LED lighting** indicate which keys can be taken, which keys are restricted and assist the user when returning the key to the correct location

14 key slot locking expansion key strip with LED indicating lights

The cabinets can be supplied with a Standard solid Metal door or optional clear polycarbonate door. The control panel consists of the user interface which includes the screen, keypad and access card or biometric reader.

PC Software Administration

The 9400 SC Series is administered from the user friendly **KeyWin 6 Pro software** supporting a **Microsoft Access** or **SQL database**.

The 9400 SC Series can communicate with the KeyWin 6-Pro software using a range of different options including **Ethernet, GPRS, RS485, RS232** and **modem**. **Multiple systems can be networked together** over a local or wide area network to provide accountability for a limitless number of keys administrated from multiple PC workstations running the KeyWin 6-Pro software.

User Identification

The 9400 SC Series can support any type of access control device required to identify a user to the key system. Supported devices include **RFID proximity readers** from all leading access control manufacturers, **magstripe**, and **barcode**. **Biometric is not available for 9400SC**

Optional polycarbonate clear door with metal frame at extra cost

Specifications

Cabinet Dimensions: 746 x 370 x 140 mm

Weight: 25 kg

Power Supply: Input: AC120-240V Output: VDC

Key Management Software

Smart and Simple

Administrative tool for
management of your
valuable keys

KeyWin 6-Pro Standard Light software license is
included free of charge with all **Key-Box** key
management systems with no annual fees!

Key-Box Key Systems are Powered By

KeyWin 6-PRO

Standard Key Management Software with Total Accountability

KeyWin 6-PRO Standard Software Gives you total control. Easy to use, Easy to Manage

Flexible KeyWin 6 makes it easy to manage everything from around 10 keys up to several thousand keys. You can use one key cabinet or 100 key cabinets in the same key management system and at different locations. The key management system can be managed by a single administrator, or shared with other administrators.

Users, groups and keys are simple and quick to register. You determine which users and groups get which keys by connecting them in the key management system. Every use of the key is registered, and a simple search lets you find out who has had what key and when.

KeyWin 6-PRO Standard Software Countdown Function Feature

This function determines how many times the user can enter the key cabinet, value box or compartment

KeyWin 6-PRO Standard Software Provides total Control of your keys - Even from the other side of the world

KeyWin 6 keeps your keys in order. You can easily connect via TCP/IP and communicate via the network connection so you can simply administer and program your Key control series key cabinet, whether you are in the same office block or anywhere in the world.

You log into the key cabinet as a user using your personal code. Each key has a key peg with a unique identity, which is placed in a strip that in turn communicates with the KeyWin 6 key management program, where each separate event is registered. The key strips then indicate which keys you have access to or, if a key has already been removed, you receive information on the display about who is using the key. You can also search for historic information about keys in KeyWin5 program.

KeyWin 6-PRO Loaded with Features

Easy to Use

The administrator determines the members of staff who have access to a specific key by entering which user can log into the key cabinet or value box with his or her personal code.

Create User Groups

You can simplify administration when there are many users with different access rights by creating groups. It is possible to create both key groups and user groups

Name Keys

You give each key a name of your choice, or a key ID, to create order in your key management.

Intelligent Search Functions The search function finds everything in KeyWin, since it searches on files, email, contacts, groups, alarms, etc. - as fast as you type.

Visual Cabinet View Gives you the option to view the key cabinet's status and edit the keys in the key cabinet.

Time Channel Limit a group's use by setting a time channel. The group's keys are available when the time channel is active.

Event Log All events are registered in the log, both from key cabinets and from KeyWin5. You choose what will be shown. The intelligent search function, with select options and timeframe, simplifies obtaining the right information and producing reports

Backup You can easily create backups for the entire key management program. They are automatically named with the date and time; it is just as simple to restore the backup as it is to create it

Alarm Indication When you receive an alarm, the alarm is clearly marked by a red event in the event log and you can easily see who or what has triggered the alarm

Export You can always make a backup of the event log. Either via a CSV file which you can import to Excel or direct to a PDF file

Communication Settings You have a number of possible communication settings that can be synchronized with your network.

Alarm Settings You can choose between many different alarms for your key cabinet. For example, door alarm, key alarm, break-in alarm, etc.

KeyWin 6-PRO and KEYBOX Security Key Cabinets

The Key-Box series smart range of electronic key cabinets with electronic key identification for monitoring and control of each individual key. The Key-Box administration is performed using the PC program keyWin 6 Pro, where all events are logged and saved
