BetterWay Auto Superstore is a large Pre-Owned Vehicle Dealership located in Stoney Creek ON, providing sales and services to the local and surrounding areas.

Chris MacKinnon, Owner/General Manager of BetterWay Auto Superstore writes; “We have an inventory of 100 to 120 vehicles at any time and after experiencing missing, lost keys and a vehicle theft this Spring we decided it was time to get organized with a proper key control system”.

“After weeks of research into various products in the market place for key systems, we decided to purchase the 9500SC Key-Box model through Time Access Systems Inc.”

“From the initial contact with Kat Smith, Sales representative at Time Access Systems Inc., the service we received was excellent all the way from general questions right through to installation of the Key-box.

The self installation of the two Key-Box units was pretty easy taking about 2 to 3hrs to install and set up the program, the Quick Start Guide instructions were easy to understand and when we had a question, Time Access Systems Inc. was just a phone call away to help complete the task.” When we asked about their team’s experience with the installation, Chris answered; “We wouldn’t see the value of paying extra for a team to provide an install of this product -not that difficult to complete yourself!”, Chris also added;

“We have been extremely happy with the Key Box system and would definitely recommend the product and Time Access Systems Inc. service’s to anyone.”

After just 3 months of using their Key-Box 9500SC System, BetterWay Auto Superstore confirmed, **“We have no more issue looking for keys on peoples desks, left in service departments or people’s pockets. Since having the Key-Box we haven’t lost any keys and our insurance company provided a small discount on renewal.”**
