[Case Study](#) / [End Users](#) / [About Our Company](#)

Lt. Daphne Smith, Yavapai County Detention Services Division writes:

"In the spring of 2015 we ordered several Key-Boxes from Time Access Systems Inc. With hundreds of keys to keep track of and no reliable system in place to do so, the security of our jail was vulnerable. It was obvious we needed to improve our key control. After months of researching and comparing products from 5 different companies we chose the Key-Box from Time Access Systems Inc.

Key-Box offers user friendly software, various access options into the cabinet itself (PIN code, proximity card, biometric fingerprint, breathalyzer) **and is priced right**. The intelligent fob is another feature that stood out over some of the other companies, making the Key-Box our first choice.

The sales representative at Time Access Systems Inc. was 'top notch', professional and pleasant. They were very patient with us during the process of choosing and then acquiring our Key-Boxes. Answered all questions promptly and maintained contact with us long after our order.

Installation and setup of the Key-Boxes was quick and simple. There was no need to pay for installation assistance. Any questions or difficulties we had were addressed immediately and resolved.

The transition from our old system to the new Key-Boxes has been virtually seamless. Our key control has improved significantly. Better accountability and increased efficiency were just what we were looking for. Spending valuable time researching who has the missing key is a thing of the past. We are very pleased with the Key-Box system and would recommend the product without hesitation; in fact we are in the process of ordering two more Key-Boxes!"

About Time Access Systems

When our company was incorporated back in 1991, we did it with a goal of being the best in our field. We took our many years of experience and inquired into our customer's needs. Our clients told us what they wanted for their security key management requirements and we delivered. From there we've built a strong business with staff members who take pride in their work, their expertise and our ongoing mission to lead our industry will make us our customers first choice in key/asset management systems and security products. Our customers are positioned at the top of the organizational chart at Time Access Systems Inc. From the beginning of the sales/consulting process to the setup of a basic key management system or the sign off of an extensive system implementation, it will be clear our only objective is the ultimate satisfaction of our clients.
