Safety Solutions for Users Accessing Key Cabinets

Secure Safety Solutions

At **Time Access Systems** we do care As a matter of fact one of our concerns for today's businesses and organizations is the protection of our clients most valuable asset which is their staff from the treat of illness or viruses when they are on the job site. Unfortunately not every staff member is able to work remotely; many essential workers must enter their work place such as Plants, Industrial facilities, hotels, correctional facilities, law enforcement, and other locations in order to preform their work. A lot of these individuals use keys every day as part of their routine daily duties to access controlled and restricted areas of the facilities they work in

Time Access Systems Inc has been offering **Key-Box** key systems with with swipe card access as well as touchless proximity card access readers for a number of years. Every one of our key cabinets is built with heavy duty steel cabinet construction with durable powder coating surfaces to resist corrosion that can be routinely wiped clean These features/options have always made **Key-Box** key management systems an easy choice for helping to resist the spread of viruses and disease and keeping staff and visitors safe and healthy.

Because key usage is something that cannot be made fully touchless, Time Access is now offering their **Key-Box** key systems with two optional **Bio-Access** touchless Facial Recognition access facial readers for accessing the key cabinets The **1st option** is our **Bio-Access** fully touchless facial recognition access reader, **2nd option** is our unique **Bio-Access** fully touchless facial recognition system with advance temperature detection for detecting fever temperature of users and accessing the key cabinet, Our **Key-Box** new optional Biometric touchless features will enable authorized users to access their **Key-Box** key cabinet without physically contacting the outside of the unit.

Please see Page 2 for more details of both biometric touchless access systems

At **Time Access Systems Inc** your safety matters to us. We are always researching and innovating our products to keep up not only with the latest in available security access technology, but also with the latest available personnel health protection as well.

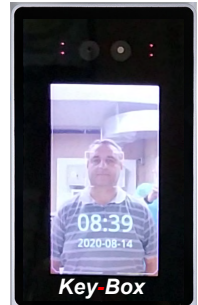

We are proud to introduce **Bio-Access** the most advanced state of the art touchless facial recognition access system for our **Key-Box** key systems

Bio-Access Secure Safety Solutions

Key-Box Key Management Systems offers two optional **Bio-Access TOUCHLESS** quality Advanced Biometric Facial Recognition access facial Screen reader for accessing key cabinets

The **1st option** is our **Bio-Access** fully automated **TOUCHLESS** Facial recognition access reader with No Touch screen access to the key cabinet without the user touching the screen or the key cabinet

The **2nd option** is our **Bio-Access** fully automated **TOUCHLESS** Facial recognition with true temperature detection access reader with No Touch screen for detecting temperature of users and accessing the key cabinet without the user touching the screen or the key cabinet

Please Note Biometric Facial Access Readers
Are Only Available for Key-box 9500 SC series

The Bio-Access touchless biometric facial recognition access readers are available as an option for all **Key-Box 9500 SC series key cabinet systems**

We encourage our clients to take all precautions possible to help protect their employees. Please reach out to local government agencies for current recommendations for preventive action for your workplace, here are a few tips to consider for your key cabinets.

Best Practice for Using **Key-Box** Key Management System Safely

- Wipe key-Box key cabinets down each regularly with a damp (Not Wet) disinfectant wipe or a cloth with a mix of water and rubbing alcohol. Care must be taken when wiping the touch screen as not to damage it.
- Wipe each Intelligent key fob with a rubbing alcohol solution or disinfectant wipe at regularly (at least 2 times a week)
- Place a box of latex gloves near each Key-Box key cabinet with signage encouraging their use.
- Place disinfectant wipes (Clorox or Lysol) near each Key-Box for employees to wipe down after each use. Health and Safety matters to us all!
