Secure-Lock
Key Management Solutions

- Secure locking key cabinets with secure individual locking key holders
- Secure key wall boards with secured individual locking key holders

## Secure Key Management Solutions for all Businesses/Organizations

Our **Secure-Lock** alternative key management systems provides user friendly key control solutions for all sorts of facilities/businesses that require an organized key solution. The keys to your facilities and business are one of its most important assets. Without access to your keys you cant control your business and facility keys and other assets. The secured key system provides the perfect solution by giving you the highest level of control and security for your valuable facility keys.

With our **Secure-Lock** key system, management and staff will always know who has removed the facility keys and who the users are that have the key/keys etc. Thus saving a lot of time if another user requires a certain facility key or keys that are not in the cabinet or wall board key system.

The way our **Secure-Lock** key systems work is an authorized user with their assigned access ID key enters their ID key into the key lock holder with the facility key/keys they require once the user ID key is entered into the key lock holder the facility keys are released. When the user returns the keys they would insert the key holder with the attached keys back to the key lock holder, the key lock holder would than release the users ID key.

North America's Most Affordable Key Management Systems

Secure-Lock

Secure-Lock secures and helps

- Prevent Loss or Keys
- Secure Keys and Protect Facilities
- Control Access to Facilities/Areas
- Track who removed the keys
- Eliminate Cost for Replacing Lost Keys
- Save More, Spend Less on Key Control

Do you know where your valuable facilities keys are? With Secure-Lock key systems you'll always know where your keys are

A smarter way to keep track of facility keys. The **Secure-Lock** key systems comes ready to use. Simply snap keys together on a locking strap with an ID tag and place into keyboard. Keys can only be removed with an access key. Once an access key is used to release the keys the access key cannot be removed until the keys are placed back into the board. Assign access keys to authorized staff and service people. You'll always know who has the facility keys by looking at the personalized access key. A master key provided with each system will remove all keys without remaining in the board so that all keys can be removed in case of an emergency available with or without locking steel cabinets. The **Secure-Lock** key system wall boards and cabinets are built from textured powder coated aluminum making them easy to mount, inexpensive to ship and easy to maintain.

Secure Solutions for Securing your Facility Keys
