Intelligent Storage Locker Systems

Intelligent Solutions for Storing Your Valuable Assets

Key-Box Intelligent Locker Systems
Important things require secure systems

Available Power Charging Option for Cell Phones, I Pads, Radios & Other Electronic Devices for Charging While Being stored

The *Key-Box* **7000 SC** Intelligent Locker System S series is a flexible and smart solution that offers even more control over your valuables. The keypad comes with a display to pro-vide a good overview and easy programming. The cabinets can handle up to 500 users (codes with 1-8 characters) and store up to 3,600 events. Just like our more advanced key management systems, you can administer system using our smart **KeyWin 6 Pro software**. The cabinets are available in various models with 2 to 6 compartments. All cabinets can be expanded using the expansion series, Expansion, by up to 15 cabinets in any combination. In other words you can have up to 96 compartments in the same system controlled via the main cabinet's keypad

NEW

KeyWin6 Pro

The KeyWin6 Pro intelligent software keeps track of every key or storage compartment. The Keywin6 Pro gives you total control of your system down to user and key level. Log in to your PC and manage your Key-Box Locker system with simplicity or login to a Web browser and control your system with a PC, tablet or smart phone to reserve keys. The remote management feature saves valuable time for your business and for staff who need access to a storage compartment.

Key-Box Affordable Asset Storage Solutions

Key-Box Intelligent Asset Management
For all Types of Businesses and Organizations

Key-Box Lockers improve equipment availability, reduce down time, make users more accountable, reduce loss, improve record keeping

Sensitive Files, Tools or Equipment

Mobile Phones

Data Equipment

Portable Radios or Other Assets

I Pads, Laptops & PDA's Storage

For Storing/Securing all Businesses/Organizations/ Valuable Assets

7000 SC Series

The *Key-Box* **KeyWin 6 Pro software** provides a full audit trail and real time reporting, detailing who has used and accessed the cabinet and when. As a result, staff become more accountable and our customers have found that items are returned at the end of shifts. This leads to reduce security requirements with less loss, damage and liability

Benefits

- From 2 x compartments all the way up to 96
- Manage, control and report on the use of locker compartments
- Identify when the locker system was accessed and by whom
- Restrict access to specific staff and contractors to access the locker system to remove the stored items
- Improve shift start-ups by ensuring facility items are always in place and ready to use in the locker
- Completely remove the need for manual compartment use
- Reduce losses and damage by making users fully accountable
- Fully scalable to accommodate any number of compartments
- 24/7 Audit trails of all locker compartment access event

Key-Box **7000 SC series Intelligent Locker Systems for Securing Your Valuable Assets**

Key-Box Key Systems are Powered By

KeyWin-PRO

Standard Key Management Software with Total Accountability

KeyWin PRO
Gives you total control. Easy to use, Easy to Manage

Flexible KeyWin Pro makes it easy to manage everything from around 10 keys up to several thousand keys. You can use one key cabinet or 100 key cabinets in the same key management system and at different locations. The key management system can be managed by a single administrator, or shared with other administrators.

Users, groups and keys are simple and quick to register. You determine which users and groups get which keys by connecting them in the key management system. Every use of the key is registered, and a simple search lets you find out who has had what key and when.

KeyWin PRO Standard Software
Countdown Function Feature

This function determines how many times the user can enter the key cabinet, value box or compartment

KeyWin PRO Standard Software

Provides total Control of your keys - Even from the other

side of the world

KeyWin Pro keeps your keys in order. You can easily connect via TCP/IP and communicate via the network connection so you can simply administer and program your Key control series key cabinet, whether you are in the same office block or anywhere in the world.

You log into the key cabinet as a user using your personal code. Each key has a key peg with a unique identity, which is placed in a strip that in turn communicates with the KeyWin Pro key management program, where each separate event is registered. The key strips then indicate which keys you have access to or, if a key has already been removed, you receive information on the display about who is using the key. You can also search for historic information about keys in KeyWin5 program.

### KeyWin5 - PRO Loaded with Features

Easy to Use
The administrator determines the members of staff who have access to a specific key by entering which user can log into the key cabinet or value box with his or her personal code.

Create User Groups
You can simplify administration when there are many users with different access rights by creating groups. It is possible to create both key groups and user groups

Name Keys
You give each key a name of your choice, or a key ID, to create order in your key management.

KeyWin PRO

Intelligent Search Functions
The search function finds everything in KeyWin, since it searches on files, email, contacts, groups, alarms, etc. - as fast as you type.

Visual Cabinet View
Gives you the option to view the key cabinet's status and edit the keys in the key cabinet.

Time Channel
Limit a group's use by setting a time channel. The group's keys are available when the time channel is active.

Event Log
All events are registered in the log, both from key cabinets and from KeyWin5. You choose what will be shown. The intelligent search function, with select options and timeframe, simplifies obtaining the right information and producing reports

Backup
You can easily create backups for the entire key management program. They are automatically named with the date and time; it is just as simple to restore the backup as it is to create it

Alarm Indication
When you receive an alarm, the alarm is clearly marked by a red event in the event log and you can easily see who or what has triggered the alarm

Export
You can always make a backup of the event log. Either via a CSV file which you can import to Excel or direct to a PDF file

Communication Settings
You have a number of possible communication settings that can be synchronized with your network.

Alarm Settings
You can choose between many different alarms for your key cabinet. For example, door alarm, key alarm, break-in alarm, etc.

KeyWin PRO & KEYBOX Security Key and Locker Cabinets

The Key-Box series smart range of electronic key cabinets with electronic key identification for monitoring and control of each individual key. The Key-Box administration is performed using the PC program keyWin Pro, where all events are logged and saved
